

Judy G. Russell, JD, CG, CGL

The **Legal** Genealogist

2016-2017 Lecture List

GENEALOGY AND THE LAW

“An Act for the Relief of Gregory Thomas and Others” – The Private Laws of the Federal and State Governments

Few researchers realize that many early federal and state laws were private laws - specifically for the benefit of individuals or families. The records can be fabulous for genealogists. Learn how to find these genealogical gems in federal and state collections.

“Disabled or Deceased in the Line of Duty” – Military Pensions and the Civil War

Union blue or Confederate gray, Civil War veterans sought pensions in record numbers, and the laws of both federal and state governments granted them. The war even impacted benefits for service in earlier wars. Learn who was eligible and what can be found in pensions records created during and after the Civil War. [Also available in versions solely as to Union pensions and solely as to Confederate pensions]

“Death by Undue Means” – Coroner’s Records

From colonial times to today, death not attributable to natural causes required investigation. Elected or appointed coroners worked with local juries to determine more about what caused each death. Learn more about coroner's records and how to use them in genealogy.

“Deemed a Runaway” – Black Laws of the North

Slavery's force was felt far north of the Mason-Dixon Line, and the Black Laws of northern states created valuable records for tracing African-American families. Learn how understanding this law and its records can be uniquely rewarding for descendants of slaves and slaveowners alike, and of those who were their neighbors and friends.

Doing Time – Prison Records as Genealogy Resources

The brickwalls of a family tree are no match for prison walls. From intake photo to receipts for cash and clothes when they were released, prisoners in jails and prisons were recorded and documented, often in stunning detail. Learn what records may exist – and where – about your family's black sheep.

“Don’t Forget the Ladies” – A Genealogist’s Guide to Women and the Law

In early America, women were all too often the people who just weren’t there: not in the records, not in the censuses, not on juries, not in the voting booth. The common law relegated women to “protected” – second-class – status and understanding how they were treated under the law provides clues to finding their identities today.

Dower and Dowry: Women, Property, & Legal Records

Bringing property into marriage or trying to take it out, our female ancestors were governed by laws that generated valuable records. Learn about the common law dower and the civil law dowry, how they differed, and how to find the stories the records tell.

Dowered or Bound Out: Records of Widows and Orphans

Widows and orphans have always had a special place in the law. But it’s not always the place that 21st century researchers might expect. An orphan in the early days wasn’t a child whose parents had died, but rather a child whose father had died. The law didn’t care much about the mother. She was just the widow, entitled to her dower rights and generally not much more. Learn more of the way the law treated widows and orphans, and what the records may tell us about them.

Finding the Law

Time and time again, we’re told as genealogists that we need to look at records in the context of the law at the time and in the place where the records were created. Easier said than done! With 50 states and the federal government all passing laws, how do we find the laws we need?

From Blackstone to the Statutes at Large – How Knowing the Law Makes Us Better Genealogists

To understand our ancestors’ lives - why they did what they did, we need to understand the law that governed their lives in so many ways. Learn how knowing the law our ancestors lived by helps us make sense of the records they left and find clues to more and different records.

From the White Lion to the Emancipation Proclamation – Slavery and the Law Before the Civil War

No issue more bitterly impacted early America than slavery. Defended by some, decried by others, slavery left its mark on the laws of the nation and all the states, slave or free. The records created by those laws provide critical clues for genealogists, whether descended from slave or slaveowner.

How Old Did He Have To Be...?

Is *this* man John the father or John the son? Could *that* man be my ancestor who married in 1802? Knowing a person’s age is often the key to distinguishing between two people of the same name. But if no record gives a birthdate, how do you know how old someone was? The law can often give the answer.

Inventing America – Records of the U.S. Patent Office

Americans have always been tinkerers and inventors. Records of the U.S. Patent Office can enrich any family's history. Where can those records be found today, and what can they tell us about our families?

Laws of the Indies: Spanish Colonial laws and the records they produced

From town planning to native relations, "Las Leyes de Las Indias" (Laws of the Indies) governed Spanish colonies of North America and beyond, and created unique records for research for anyone with ancestral ties to the Caribbean.

Lincoln's Laws and the Records of War

President Lincoln's General Order 100 – "Instructions for the Government of Armies ... in the Field" – revolutionized the laws of war. Learn more about the way war changed – and about the new records that were created for genealogists to research.

Living with Legal Lingo

The language of the law is part Greek, part French, part Latin, even part Saxon - and all confusing. Every family's records are chock full of legal lingo that can appear utterly baffling to even an experienced genealogist. But whether it's for a family as famous as Daniel Boone's, or one as ordinary as yours or mine, understanding the legal lingo in the records is a critical part of understanding the records themselves.

Making a Federal Case Out of It

Even genealogists who have a good background in court records often overlook the wealth of detail available in the records of the federal courts: the District Court and the Circuit Court (now Circuit Court of Appeals). From bankruptcies to copyrights to patent to cases in admiralty jurisdiction and more, federal court records merit a close look.

Martha Benschura – Enemy Alien

Not all our ancestors were naturalized. The ones who didn't suddenly became suspect when war divided their native countries from their new residences, creating the kinds of records genealogists love.

NARA Mythbusters: Your Family IS in the Archives

"All the military records were burned in the fire." "There isn't any birth, marriage or death information in federal records." "There aren't any details about ordinary families at the National Archives." These kinds of myth-statements stop genealogists from breaking down all kinds of brick walls using the wealth of information in NARA records. Join the mythbusters with the treasures the National Archives holds for your family.

"No Person Shall ... Gallop Horses In the Streets" – Using Court Records to tell the Story of our Ancestors' Lives

Early court records give color and meaning to the lives and times of our ancestors. County courts often functioned as both judiciary and legislature, and appeals courts published fact-filled opinions. While the records often establish relationships to help build a family tree, they offer so much richness and depth to help tell a family's story.

Pardon me, sir! – The “Get Out of Jail Free” Card

Not every criminal was sent to jail and served out a sentence. Some received a “get out of jail free” card – a pardon. Pardons could prevent charges from being filed, shorten sentences, or give convicts back their civil rights if they’d already served time. And the records can be goldmines.

Polls, Personalty and Property – Making Sense of Tax Lists

Somebody had to pay government’s bills, and they did it through the law by imposing taxes on polls, personal property and real property. The records of those taxes offer some of the best clues available to our ancestors, their families and their neighborhoods.

Property Rights and Wrongs – African-Americans at the Courthouse

From being treated as property to having their property stolen by those who used the law against the freedmen, African Americans’ experience at the courthouse had only one bright spot: it created records for the genealogist-descendants of slaves and slave owners alike.

Revelers, Hogkillers and Disobedient Children: Early State Laws

The laws our ancestors lived by tell their own story of life in earlier times, and early state laws from every part of the nation tell the stories of Blue Laws, wild animals, and children needing humbling.

Rogues, Rascals and Rascallions: The Family Black Sheep

Playing detective in court records can unmask those black sheep every family has – and it’s fun! Learn to understand the criminal process in both federal and state courts and how to find the records to put meat on the bones of the skeletons in your family’s closet.

Separate but Unequal: Slave Laws and their Records

Whether north or south of the Mason-Dixon line, laws governed enslaved Americans, free people of color and slave-owners alike, creating a treasure trove of records for today’s genealogists. [For northern states only, see “*Deemed a Runaway.*”]

That First Trip to the Courthouse

If there is one home truth in genealogy research, it’s this: not everything is available online. Sooner or later, every genealogist has got to make that first trip to the courthouse to check out the original records available there. How to prepare for that trip, the rules of the road, what to expect, what to ask for, and how to be sure you’ll be welcomed back the next time are explored in this lecture.

The Fair Court – Records of Chancery Courts

Only one court has ever had doing what’s fair as part of its official mission: the chancery court. With different names in different states (and countries), it was often the go-to court for cases of great genealogical value, including divorces, guardianships, real property partition and more.

The Gentlemen Judges: Justices of the Peace

Landowners but legal laymen, America's early justices of the peace served up ground-level justice and local governance, creating records unparalleled for genealogists.

The Seanachie: Linking Life and Law through Storytelling

As genealogists, letting ourselves ramble through the statute books and other legal records can help us tell the stories of our families with rich detail that won't be forgotten.

The Ties that Bond

From marriage bonds to officials' bonds, sureties given in a wide variety of circumstances can offer clues to our family members and their friends, associates and neighbors.

Through the Golden Door: Immigration After the Civil War

America's doors were open to all before the Civil War, with few restrictions. Afterwards, the laws began tightening, with exclusions, quotas, even required visas. How did the immigration laws affect your ancestors who immigrated after the Civil War? What hoops did they have to jump through to enter America's "golden door"?

"To the Honorable, the General Assembly" – The Treasure Trove in Legislative Petitions

As colonists and as citizens of the new United States, Americans were fiercely protective of their right to petition their government. Whether the issue was forming new counties, building bridges and highways, or some matter of public concern, our ancestors made their voices heard in legislative petitions that are a treasure trove for genealogists.

"Twelve Good and Lawful Men": Jury Lists in Genealogy

One of the most common experiences of our ancestors with the courts was the requirement of jury service. Learn to understand who could and couldn't serve, how jurors were called, and how to use jury lists in family research.

Where There Is – or Isn't – a Will

Where there's a will, there's a probate. And often when there isn't a will, there's still a probate. Understanding the process and finding the records created when our ancestors died can help break through those brick walls.

Who, What, Why, When, Where and How of American Divorce

Our ancestors' marriages lasted so much longer than our own. One reason: it was so hard to get a divorce. But it still happened, and the records created in the process tell us much about our ancestors, their lives and the laws they lived by.

GENEALOGY METHODOLOGY

More Than Just Names: Advanced US Census Research

Those every-10-years U.S. censuses are goldmines of names, ages and birthplaces for members of our families. But there's so much more in the census records if we know where to look: everything from socioeconomic status to crops grown or products made, from school attendance to marriage dates, from physical disabilities to causes of death, from military service to clues that lead us to other sources. Learn how an advanced search of the U.S. census records can add to your family history.

No Vitals? No Problem! – Building a Family through Circumstantial Evidence

When there's no birth, marriage or death record, what's a genealogist to do? Learn how to use circumstantial evidence to build a family.

Three versions:

1. *Bringing Josias Home* (tracing a man who died in Texas in 1870 back to his North Carolina parents);
2. *A Family for Isabella* (tracing a woman married before the 1850 census);
3. *Who in the World was Paul Knop?* (tracing an unknown relative named by 20th century German immigrants). Also available as a two-hour workshop]

Shootout at the Rhododendron Lodge: Reconstructing Life-Changing Events

A 1929 shootout left the Bath County, Virginia, sheriff dead. Learn to follow the trail through all the records to reconstruct a life-changing event, and understand its unique challenges, both in terms of resources and in terms of ethics.

That Scoundrel George

Tracking a black sheep ancestor through the records can be great fun – and a great challenge. When every record he ever left appears to be a lie, where is the truth to be found?

When Worlds Collide: Resolving Conflicts in Genealogical Records

The Genealogical Proof Standard says to resolve conflicts in data... but like so many things that sound good, it's easier said than done. What exactly are we supposed to do when we encounter conflicting evidence? What are the basic types of evidence conflicts and the methods – and tips and tricks – we can use to resolve them? [Also available as a workshop]

COPYRIGHT AND ETHICS

Copyright Mythconceptions

What we don't know about copyright law can hurt us – right in the pocketbook! Here's a guide to the most common mistakes and misunderstandings about copyright and what we can and can't do with materials created by others in our family research.

Facts, Photos and Fair Use: Copyright Law for Genealogists

Understanding what is and isn't copyrighted and what genealogists can and can't use is the key to staying out of trouble and to protecting our own work. Learn about what copyright is, and what it isn't.

Picture This! Images We Can Freely Use

Copyright. Licensed. Public Domain. The difference between an image that's covered by one of these terms rather than another can be the difference between getting sued for using an image in your genealogy report or book or blog or website – and having no problems at all. Here's how to find images we can freely use.

Roadblocks, Red Lights and Detours: Records Access for Genealogists

This was supposed to be the Age of the Information Superhighway. Instead, even as so many records are coming online, doors are being slammed shut on so many more – often records that aren't and won't be online, now and perhaps ever. As a community and as individuals, learn what we can do to protect records access.

Staying Out of Trouble – The Rights and Responsibilities of Today's Genealogists

As genealogists and researchers, we must understand today's laws as much as yesterday's. Modern law impacts our rights as researchers—rights of access to vital records, to information, and to places where information can be found. And it impacts our responsibilities, as well, particularly the need to respect another's copyright.

The Ethical Genealogist

Genealogists deal with sensitive issues all the time: how to handle family secrets, what to say about living people, crediting the work of others. Learn more about the ethical challenges of trying to solve family history mysteries in the 21st century.

GENETIC GENEALOGY

ABCs of DNA

New to the idea that DNA can help with genealogy? Learn about the three major test types - YDNA, mitochondrial (mtDNA) and the new autosomal DNA testing - and see what each offers to the genealogist.

After the Courthouse Burns: Rekindling Family History through DNA

Catastrophic records loss due to fires and disasters at courthouses is a fact of life for genealogists. When a disaster takes out birth, marriage, death, court, land and probate records all in one fell swoop, it may still be possible to light our family's research fires — to rekindle our interest in our ancestral roots — using DNA evidence.

Beyond X and Y: The Promise and Pitfalls of Autosomal DNA Testing

Autosomal DNA testing is the new kid on the block. Learn more about this exciting addition to the toolkit of 21st century genealogists. What's in it for you, and how can you make the most of this test?

DNA and the Golden Rule: The Law and Ethics of Genetic Genealogy

Whose permission is needed to test a child or an adult unable to consent? Who owns our DNA? What can we disclose about a cousin who has tested? The rules of the road for the ethical challenges facing genealogists interested in using DNA evidence as part of their family history research. Learn how applying the Golden Rule can guide us through many if not most of the situations in which we as genetic genealogists find ourselves.

SUITABLE FOR BANQUETS, LUNCHEONS AND THE LIKE:

Alphabet Soup: DNA, GPS & YOU

Remember the old commercial where the kid kept bugging the mother asking, "Is it soup yet?" For even our real-life non-celebrity ordinary families, the answer today is yes: with DNA, the GPS and YOU, we can all use DNA effectively to answer some of our most perplexing family history mysteries.

Blackguards and Black Sheep – The Lighter Side of the Law

No, actually, our ancestors *didn't* behave any better back then than we do today, and the records they left behind documenting their missteps and misdeeds are among the priceless – and hilarious – gems for genealogists to find.

Just Three Generations

Our oral family history can be completely lost in just three generations. Following genealogy's best practices can help us keep those losses from happening in our own families – and with our own stories.

The Rest of the Story

Going beyond the record to tell the rest of the story: how to find it, when to tell it, and when to keep it to ourselves.

WORKSHOPS

No Vitals? No Problem! - Building a Family through Circumstantial Evidence

When there's no birth, marriage or death record, what's a genealogist to do? Learn how to use circumstantial evidence to build a family. [Also available in several varieties as a single hour lecture]

Order in the Court – Hands-On with Court Records

Two-hour workshop presentation on understanding and making the most of court records of all types from minutes and dockets to reported court decisions.

When Worlds Collide: Resolving Conflicts in Genealogical Records

The Genealogical Proof Standard says to resolve conflicts in data... but like so many things that sound good, it's easier said than done. What exactly are we supposed to do when we encounter conflicting evidence? What are the basic types of evidence conflicts and the methods – and tips and tricks – we can use to resolve them? [Also available as a one-hour lecture]

Writ in Stone – Cemeteries and Genealogy

Cemeteries and the stories they tell for our families are of crucial importance to genealogists, especially when it comes to the graves of those who lived and died before birth and death recordation became standard. How can we best get access to the land, access to the records, and photograph the gravestones to capture these stories writ in stone for our families?
